RULEBOOK

Introduction

The Hackathon segment of **Techathon Nationals**, the flagship event organized by the **IUT Robotics Society (IUTRS)** is a national-level hackathon focused on **Artificial Intelligence (AI)** and **IOT Integration**. The event is designed to bring together innovative students to build impactful, scalable, and technically sound solutions within a time-constrained environment.

The event features a two-stage structure:

- **Preliminary Round (Online):** Teams are given a problem statement based on which they will provide a realistic solution and,
- **Final Round (Onsite):** Selected teams will be given another problem set and required to develop a solution in an intensive live environment.

Whether you're a student looking to challenge yourself, a team seeking recognition, or an innovator ready to make an impact, Techathon offers the idea platform to transform your ideas into reality.

Event Date:

Preliminary Round: 2nd July, 2026

Onsite Round: 10th July, 2026

Venue: Islamic University of Technology Campus , Gazipur

Team Requirements

Team Composition

Team Size

- Minimum: 3 members
- Maximum: 4 members
- Solo participation is **NOT** allowed

Cross-University Teams

- Allowed and encouraged
- All team members must be full-time students at the time of registration

Participation Eligibility

- Current undergraduate or postgraduate students
- Students who have attended final exams and are awaiting results are eligible
- No professional developers or industry employees without student status

Team Composition Rules:

- No team member may be a member of more than one team during the same hackathon
- Team members cannot be changed / substituted after preliminary round registration (unless exceptional circumstances approved by organizers)
- All team members must participate actively in both preliminary and final rounds

Registration & Fees

Registration Process

Preliminary Round Registration

- Online Registration form:

<https://forms.gle/jUBu3qxF2GgWf9CUA>

- Team leader must register the team with all member details
- Deadline: 30th June, 2026
- Fee: FREE

Team Selection

- Organizers will evaluate submission from the preliminary round
- Top teams will be selected for the final onsite round
- Selection notifications will be sent via email within 3–5 days after preliminary round conclusion

Final Round Registration

- Selected teams must confirm participation by paying registration fee
- Payment deadline: 7th July, 2026
- Non-payment by deadline will result in forfeiture of slot.

Round	Fee (per team)	Payment Deadline
Preliminary	FREE	
Final	BDT 2,000 (3 member) BDT 2,500 (4 members)	7th July, 2026

Payment Method

- Bkash, Nagad, Rocket (Bangladeshi mobile banking)
- Bank transfer (instructions provided upon selection)

Important: Team not selected for the final round will NOT BE CHARGED any fee. Only selected teams must pay the fee for their participation.

Event Rounds

Round 1: Preliminary (Online) – 24 Hours

Overview

The preliminary round is an online, 24 hour intensive development sprint designed to evaluate your team's problem-solving abilities, coding skills, and creativity in building IOT solutions.

Schedule

- Release Date & Time: 2nd July, at 9:00 pm (Bangladesh Standard Time)
- Submission Deadline: 3rd July, 9:00 pm (Bangladesh Standard Time)
- Duration: 24 continuous hours

Task Format

- A problem statement focusing on AI and/or IOT integration will be provided
- Teams must develop a functional solution from scratch
- Solution can be a web application, mobile app, desktop tool, or CLI application
- Emphasis on demonstrating effective use of AI and IOT technologies

Submission Requirements

1. GitHub Repository
 - a. Create NEW public GitHub repository during the hackathon
 - b. Repository name format:
Techathon2026-[YourTeamName]
 - c. Push all code to this repository
 - d. Repository must be created AFTER problem statement release (automatic timestamp verification)
2. **README.md** file, a comprehensive doc including
 - a. Problem statement understanding
 - b. Solution approach and architecture
 - c. Technologies used (languages, frameworks, APIs, AI models)
 - d. Setup and installation instructions
 - e. How to run the application
 - f. API endpoints documentation (if possible)
 - g. AI integration details (models used, training approach, etc.)

3. Submission Portal

- a. All submissions must be made through the official submission portal
- b. Late submissions will NOT be accepted
- c. Submission includes: GitHub links, Demo video link, and team details

Evaluation Criteria (Preliminary Round)

- Code quality and originality: 30%
- Problem understanding and approach: 25%
- AI/IOT implementation effectiveness: 25%
- Documentation clarity: 20%

Selection Process

- Top 25 teams will be selected for the final onsite round
- Selection based on overall score and quality of implementation
- Selections will be announced within 5 days after submission deadline

Round 2: Final (Onsite) – 12 Hours

Overview

The final round is an intensive 12-hour onsite development sprint where selected teams will be given a new problem set to work on.

Venue & Schedule

- **Location:** [IUT Campus, Board Bazar, Gazipur]
- **Date:** 10th July, 2026.
- **Time:** 8:00 am to 8:00 pm
- **Check-in:** [1 hour before event start]

Format & Structure

- Phase 1: Problem Introduction & Enhancement (1st hour)
 - Official event kickoff with keynote address
 - Introduction to the new problem statement
 - Mentorship team introduction
 - Logistics, facilities, and rules briefing
- Phase 2: Development Sprint (Middle 10 hours)
 - Teams work on their solutions
 - 30-minute mentorship slots available
 - Food and refreshments provided throughout
- Phase 3: Final Submission & Judging (Last 1 hour)
 - Code submission deadline
 - Final repository push and documentation update
 - Demo preparation
 - Judges' evaluation (science fair or stage format – TBD)

Submission Requirements (Final Round)

1. GitHub Repository Update:
 - Update the repository with your code base.
 - All new code must be committed with clear commit messages
 - Include updated README with final implementation details
2. Updated Documentation:
 - API endpoints used and their documentation
 - AI model specifications and performance metrics
 - Team member contributions breakdown
 - Challenges faced and solutions implemented
 - Future scope and improvements
3. Live Demonstration:
 - 5-minute presentation to judges
 - Live demo of the application
 - Explanation of technical decisions
 - 2 minutes for judge Q&A
4. Deployment/Running Instructions:
 - The application must be runnable on-site
 - Pre-deployed version (cloud URL) is acceptable
 - All dependencies clearly listed
 - One-command setup preferred

Facilities Provided (Final Round)

- ✓ Power outlets and charging stations
- ✓ Workspace and tables
- ✓ Projectors for team presentations
- ✓ Meals (breakfast, lunch, snacks)
- ✓ Snacks and beverages throughout the event
- ✓ First aid services
- ✓ Rest areas with basic amenities

What to Bring

- Laptop, multiplug, and charger
- Personal development tools and equipment
- Mobile/power banks
- Any personal medications
- Comfortable clothing

Note: Organizers will NOT provide laptops or development software. Teams are responsible for their own Internet Connection.

Rules & Guidelines

Development & Code Requirements

ALLOWED ✓

- Any programming language or framework (Python, JavaScript, Java, Go, C++, etc.)
- Public APIs (Google Cloud, AWS, Azure, OpenAI, etc.)
- Open-source libraries and frameworks
- Open-source datasets
- AI/ML models from Hugging Face, TensorFlow Hub, etc.
- Pre-trained models (with appropriate attribution)
- AI coding assistants (GitHub Copilot, ChatGPT) for assistance
- Cloud deployment (Heroku, Vercel, Render, etc.)
- Database services (Firebase, MongoDB Atlas, PostgreSQL, etc.)
- Using ideas from before the hackathon (but NOT pre-written code)
- Consulting documentation and tutorials
- Peer support from other teams

NOT ALLOWED ✗

- Plagiarism: Copying code from other teams or online sources without attribution
- Pre-built code: Using significant portions of code written before hackathon starts
- No-code/Low-code platforms: Bubble, Wix, WordPress, Squarespace, Webflow (without custom code)
- Purchasing code: Hiring external developers or buying solutions

- External development: Working with non-team members during development
- Collaborating across teams: Sharing code or significant problem-solving approaches
- Submitting past projects: Resubmitting previous hackathon or coursework projects
- Mentor/organizer participation: Team cannot include event organizers, judges, or mentors
- Unattributed resources: Using APIs, datasets, or models without proper credit
- Unethical practices: Violating API terms of service, using unauthorized APIs, etc.

Intellectual Property (IP)

- All submitted code remains property of the team
- Organizers may use project names and descriptions for promotional purposes
- Teams retain full rights to their projects post-hackathon
- No licensing requirements imposed by organizers

Plagiarism Policy

Zero Tolerance: Any confirmed plagiarism results in immediate disqualification

Verification: Organizers will check submissions against the following:

- Plagiarism detection tools
- Online code similarity checkers
- Manual code review

Consequences: Disqualification, removal from all future hackathons, and potential institutional notification

Team Conduct Requirements

- All participants must maintain professionalism and respect
- Inclusive, harassment-free environment is mandatory
- Discrimination, bullying, or disruptive behavior results in disqualification
- Violation of venue policies results in removal without refund
- Teams must follow organizer instructions at all times

Project Requirements

Scope & Complexity:

- **Working Prototype:** Project must be functional and runnable by end of hackathon
- **Minimum Viable Product (MVP):** Full feature list not required, but core functionality must work
- **Problem Relevance:** Solution must meaningfully address the given problem statement
- **Quality over Quantity:** Focus on quality implementation over flashy features

Deployment & Accessibility

- **Acceptable:** Application runnable with clear setup instructions on provided development machines
- **Demo:** Live demo must be possible during judging
- **No Installation Barriers:** Judges should not spend time troubleshooting setup issues

Judging Criteria

Judging Panel Composition

The judging panel consists of 4–6 experts with diverse backgrounds:

- Industry AI/API specialists
- Software engineers and architects
- Startup founders or innovation leaders
- Academia (professors/researchers)
- Diversity advocates

Judging Format

Preliminary Round

- Remote judging based on submitted documentation, code, and demo
- No live presentation (code and video demo evaluation)
- Results announced within 5 days

Final Round

- Live 5-minute presentations followed by 2–3 minutes Q&A
- Science fair format: Judges rotate through team booths OR stage format: Sequential presentations
- The final decision announced after all teams present

Scoring Rubric (Both Rounds)

- 1. Problem Understanding & Relevance (20 points)**
 - Does the solution clearly address the problem statement? (0–5)
 - Does the team demonstrate deep understanding of the problem? (0–5)
 - Is the solution relevant and impactful? (0–5)
 - Is the problem well-articulated in presentation? (0–5)
- 2. AI Integration & Implementation (25 points)**
 - Is AI meaningfully integrated into the solution? (0–8)
 - Effectiveness of AI implementation (accuracy, performance, optimization) (0–8)
 - Creativity in AI usage (0–5)
 - Proper handling of AI limitations and edge cases (0–4)
- 3. IOT Integration & System Design (20 points)**
 - Successful integration of sensors, actuators, or IoT devices with the application, (if applicable then devices or required equipments will be provided by organizers) **(0–7)**
 - Design and implementation quality of the IoT software components **(0–6)**
 - Reliability, security, and error handling of device communication **(0–4)**
 - Efficient handling and visualization of IoT data **(0–3)**
- 4. Technical Execution & Code Quality (20 points)**
 - Code quality, structure, and maintainability (0–7)
 - Scalability and performance considerations (0–6)
 - Security practices (authentication, data protection) (0–4)
 - Version control and commit history quality (0–3)

5. User Experience & Design (10 points)
 - Intuitiveness and ease of use (0–4)
 - Visual design and UI/UX quality (0–3)
 - Accessibility considerations (0–3)
6. Innovation & Creativity (15 points)
 - Uniqueness of approach (0–5)
 - Creative problem-solving (0–5)
 - Use of cutting-edge technologies appropriately (0–5)
7. Presentation & Communication (10 points) – Final Round Only
 - Clarity of problem and solution explanation (0–3)
 - Demo quality and flow (0–4)
 - Team confidence and responsiveness to Q&A (0–3)

TOTAL SCORE: 120 points

Tie-Breaking Mechanism

1. Innovation and Creativity score (highest wins)
2. AI Integration score (highest wins)
3. Technical Execution score (highest wins)
4. Judge consensus discussion (if still tied)

Prize Pool

Prize Distribution

Rank	Prize Money
Champion	BDT 35,000
Runner-up	BDT 20,000
2nd Runner-up	BDT 10,000

Note: All Onsite Finalist will be awarded Participation Certificate

Important Dates & Timelines

Key Deadlines Summary

- Preliminary Registration: 30th June, 2026
- Preliminary Round: 2nd July, 2026
- Final Round Confirmation: 5th July, 2026
- Payment Deadline: 7th July, 2026

Important: Missing any deadline will result in automatic disqualification unless prior approval from organizers is obtained.

Frequently Asked Questions

Registration & Eligibility

Q: Can professionals participate?

A: No, Techathon is exclusively for students. You must be a full-time student at the time of registration.

Q: Can I change team members after registration?

A: No, team members cannot be changed after preliminary round registration. In exceptional cases (medical emergency, personal crisis), contact organizers for approval.

Q: Can I register as an individual?

A: No, the minimum team size is 3 members. Solo and 2-member teams are not allowed.

Q: Can team members be from different universities?

A: Yes, cross-university teams are encouraged and allowed.

Q: What if I'm waiting for exam results?

A: You're eligible if you've attended your final exam.

Judging & Submission

Q: When will I get feedback on my preliminary submission?

A: Detailed feedback is not provided; only pass/fail notification. However, you'll receive a score breakdown if you advance to finals.

Q: Can judges ask questions about my code?

A: Yes, judges may ask technical questions during final round presentations. Be prepared to explain your implementation decisions.

Q: What if I don't finish my project?

A: You can still submit. Incomplete projects will be evaluated based on what's submitted.

Q: How are ties broken?

A: Ties are broken by Innovation score, then AI Integration score, then Technical Execution score.

Facilities & Logistics

Q: Will food be provided during the final round?

A: Yes, meals (breakfast, lunch) and snacks/beverages throughout the event.

Q: Is accommodation provided?

A: On campus resting area will be provided for the 12 hour finale.

Q: What if there's no electricity or internet?

A: Organizers will provide backup generators and internet hotspots. However, teams should have mobile hotspots as backup.
